

Design and Technology Knowledge Organiser Term 6

Structures - Photo Frames

Key Objectives

- To identify features of photo frames, materials they are made from and how they are joined.
- To plan and design my photo frame.
- To measure and cut wood and other materials accurately.
- To assemble frame, backing and support for hanging.
- To evaluate my final outcome.

Key Vocabulary

Component	The different parts of the photo frame.
Purpose	The reason why something is made and how this changes depending on who it is created for.
Target Audience	The people who will be buying your product.
Durability	How strong, tough, hard-wearing and resistant an item is.
Aesthetics	The considerations of how the final product will look.
Free-standing	An item that can stand on its own without support or attachments.
